CSCI 332, Fall 2026

In-class Activity

In this activity, you will trace through the algorithm whatever-first-search.

```
WFS(s):
 put s into the bag
 while the bag is not empty:
  take v from the bag
  if v is unmarked:
   mark v
   for each edge {v,w}:
    put w into the bag
```

Complete the trace of $WFS(a)$ on the graph below. Remove from the bag in ***alphabetical order***.

After iteration	Took out of bag	Bag	verts that have been marked
0	–	a	–
1	a	b, c	a
